Fire Fighting Instructions	During a fire, toxic fumes may be emitted. Wear self-contained breathing apparatus. Contain runoff.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

Personal Precautions	Wear full respiratory protection (at least to organic vapour standard) eye protection, chemical resistant: coveralls, boots and gloves.
Spillage	Stop leak if safe to do so, and contain spill. For clean-up of a spill soak up spilt material with clay, sand or other non-combustible absorbent material and place into containers for disposal. If applicable, wash the area with detergent and water.

Environmental Precautions	Prevent spillage from entering drains or water courses. Absorb into clay, sand, vermiculite or other suitable absorbent material. If spill is too large or if absorbent material is not available, try to create a dike to stop material spreading or going into drains or waterways. Sweep up and shovel or collect recovery product into labelled containers for recycling or salvage, and dispose of promptly. After spills, wash area with a detergent based solution preventing runoff from entering drains. If a significant quantity of material enters drains, immediately advise local Regional Council and emergency services Dispose of clean-up materials and recovered product through an approved hazardous substances receival facility. Do not dispose of undiluted chemicals on site. Thoroughly launder protective clothing before storage or re-use. Advise laundry of nature of contamination when sending contaminated clothing to.
